

HYDAC**SOLVES****Hydraulic Accessories****MOUNTING TECHNOLOGY**

OEMs have limited time, resources, and expertise to develop and validate robust mounting solutions for their industrial and mobile machines.

TECHNOLOGY / KNOW HOW

HYDAC is familiar with many mounting and fastening methods. We can consult with your design team in a way that optimizes static and dynamic loads while compensating for vibration and expansion forces and staying conscious of commercial constraints of your project. For band straps, the HYDAC process is highly controlled and repeatable through varying degrees of automation.

**APPLICATIONS**

- Securing Molded Hydraulic Reservoirs
- Air Reservoirs or any cylindrical component
- Fuel Cells, Hydrogen Tanks, and other E-Mobility applications
- Pipe/hose routing along cylindrical components
- Exhaust solutions, including safety features
